

2021 Impact Report

Zero Manufacturing's recycling efforts resulted in the conservation of over 1.9 million kwh of energy: Enough to power 180 homes for an entire year.

This quantity of metal would have filled 1,452 cubic yards of landfill space had it not been recycled.

Zero Manufacturing prevented 551 metric tons of CO₂ from entering the atmosphere, which is equivalent to removing 119 cars from the road each year.

These recycling contributions preserved 231,000 lbs of coal, and 19,800 lbs of limestone.
